

## Staging Tips

Stage/Riser platforms have a black non-skid surface. Panels are 4' x 8' and can be elevated to 8", 16", 24" or 32" in height.

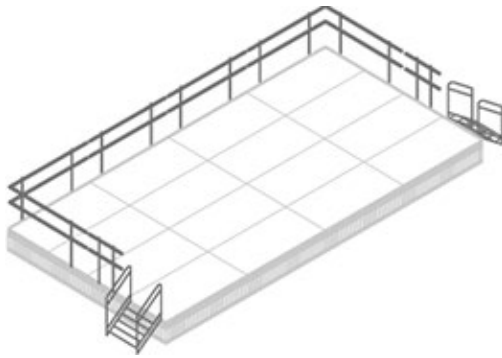

### Installation

Installation is included in the rental price and requires a solid and level floor. Customers must be present during installation. Exterior installation may require shimming. Any stage over 8" in height requires a step unit.

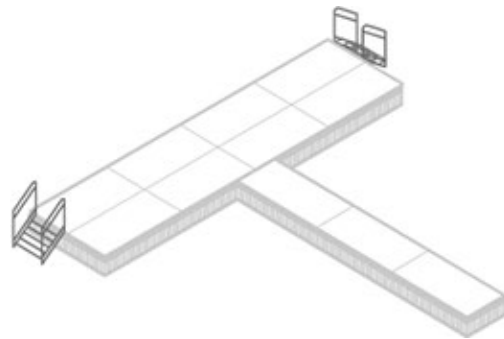

### Accessories

Railing, skirting, 4' x 4' rounded corner panels, ADA ramps, and step units with or without handrails are recommended and available at an additional cost.

### Sample Configurations:

*16' x 32' Stage, 16 panels*

*8' x 32' Stage & 4' x 24' Runway, 11 panels*
